DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 5/6/05 have been fully considered and are deemed persuasive. Applicant primarily argues that the Zang reference does not show both fast and slow AGC loops and that a reference that shows both fast and slow in addition to the power control loops is required. Since the prior art does not provide for such, the examiner now feels the application is in condition for allowance.

Drawings

2. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the submitted drawing appear to be informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

3. Claims 1-3 and 5-28 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding the claims, the examiner is in agreement with applicant's arguments in reference to the reasons for allowance.

Art Unit: 2684

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
